

Practice Code: L83044 Consortium: Mid Devon
Market Town: Cullompton District: Mid Devon

This profile has been created by the NHS Devon Public Health Intelligence Team to provide key information for your practice population and surrounding area and show how this relates to other practices in Devon.

Population

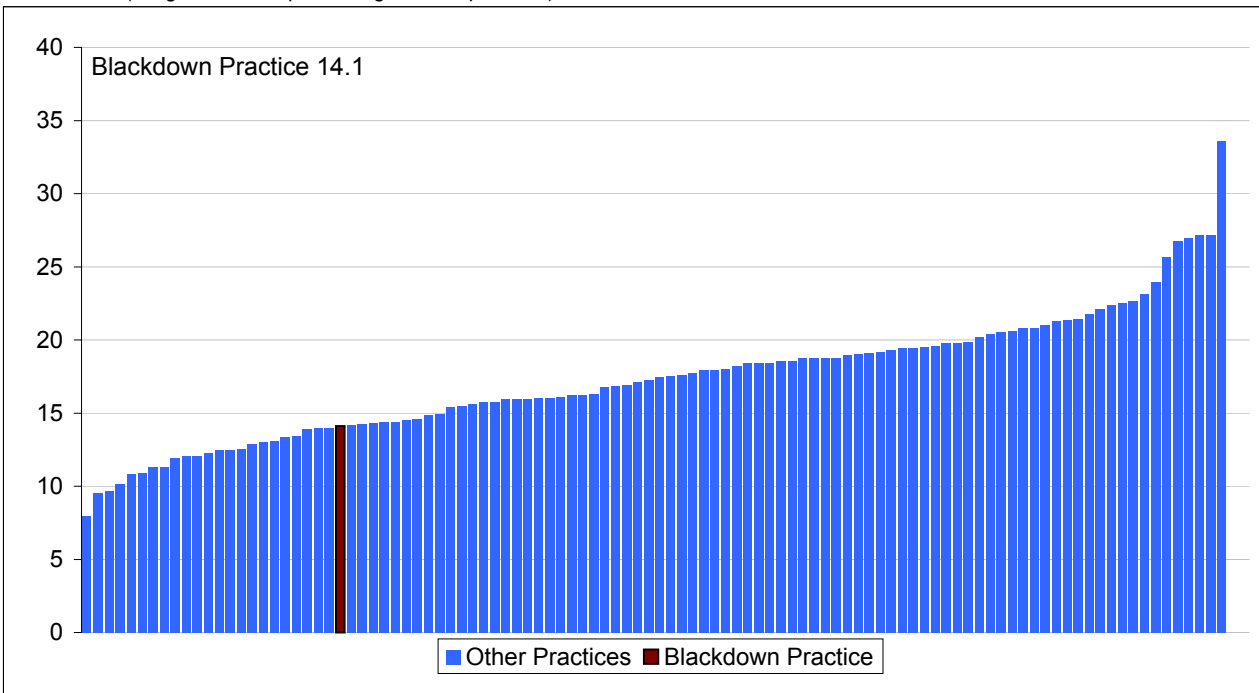

The table and population pyramid below show the population broken down by age and sex for the Practice and NHS Devon (June 2011). The age and gender of your population can have a significant impact on their needs and will have an impact on the information in the disease prevalence section of this report.

Age Group	Female	Male
0-4	122	135
5-9	217	202
10-14	193	195
15-19	129	172
20-24	138	139
25-29	130	124
30-34	172	173
35-39	264	250
40-44	287	279
45-49	287	265
50-54	257	248
55-59	145	167
60-64	309	319
65-69	276	289
70-74	224	211
75-79	167	184
80-84	161	156
85+	129	104
Total	3607	3612

Deprivation

The Indices of Deprivation 2010 provide a relative ranking of areas of deprivation across England taking into consideration factors such as Income, Employment, Health and Disability, Education, Skills and Training, Barriers to Housing and Services, Living Environment and Crime. By taking this indicator and combining it with local population figures we can calculate estimates of Multiple Deprivation for each GP Practice (a higher score represents greater deprivation).

APHO Practice Profiles

For a range of other indicators for your practice, including customer feedback survey results, please visit the Association of Public Health Observatories Practice Profiles website:

<http://www.apho.org.uk/PRACPROF>

Disease Prevalence

The graph below shows the prevalence of 16 disease areas for both your practice and for NHS Devon as a whole (based on March 2011 QOF data). The shading for each condition shows whether your practice has a statistically higher (coloured red) or lower (coloured green) prevalence compared to NHS Devon as a whole.

Standardised Death Rates (by Market Town and District)

A further indicator of the health of an area is the death rate. As practice mortality data is not always available, mortality rates (standardised for age and sex) for 19 causes of death have been calculated at a market town, local authority and NHS Devon level (using deaths registered between 2006 and 2010). The spine chart below compares these three rates, and shows whether there is a statistically significant difference between the market town and NHS Devon rate. Also shown are the fertility rates (per 1,000 15-44 year old females) over the same period (NB. these rates have been standardised and so performance will not be affected by the age and gender of your population).

Mortality Data	NHS Devon	Market Town	Worst	NHS Devon Range	Best
All	487.4	485.6	568.9		403.7
Male	574.5	571.5	690.5		433.6
Female	415.6	413.2	493.6		352.3
All (U75)	219.9	213.7	272.9		156.8
Male (U75)	267.1	266.5	355.1		162.5
Female (U75)	174.5	163.0	210.3		121.2
Cancer	156.0	160.8	177.0		136.8
Cancer (U75)	95.5	99.4	104.7		79.0
Circulatory Disease	156.4	152.5	201.6		91.8
Circulatory Disease (U75)	53.1	53.5	77.3		22.2
CHD	72.5	74.3	102.3		33.8
CHD (U75)	30.1	35.4	47.4		16.5
Stroke	43.6	35.9	59.4		29.8
Stroke (U75)	9.7	6.1	21.8		0.0
Smoking	80.0	83.2	101.0		66.6
Suicide*	7.7	3.9	14.9		3.6
Accidental Injury	15.1	16.0	25.7		7.1
Alcohol	6.1	5.4	10.6		1.2
Drugs ⁺	2.8	3.5	7.8		0.0
Fertility Rate	52.8	58.0	36.2		63.1

* Including injury undetermined * Range does not include rate for Lynton and Lynmouth (17.9)
