Information about the people that live in the area is taken from Experian's Mosaic data. Mosaic is based on the assumption that people living in an area are likely to be similar; however, it does not provide definitive description of each person. The Mosaic data are broken down in to a number of groups, each one describing a section of the population.

## Social Inclusion and Deprivation

### Indices of Deprivation

The Indices of Multiple Deprivation (IMD) are the main source of data relating to deprivation in England. Each area is given a score for each of the seven domains, which are then combined to provide an overall estimate of deprivation. An IMD score has been calculated for each of these areas (and two sub areas) for your constituency, marked with an X on the graphs below. The scores for the other constituencies are shown by the light blue diamond shapes.

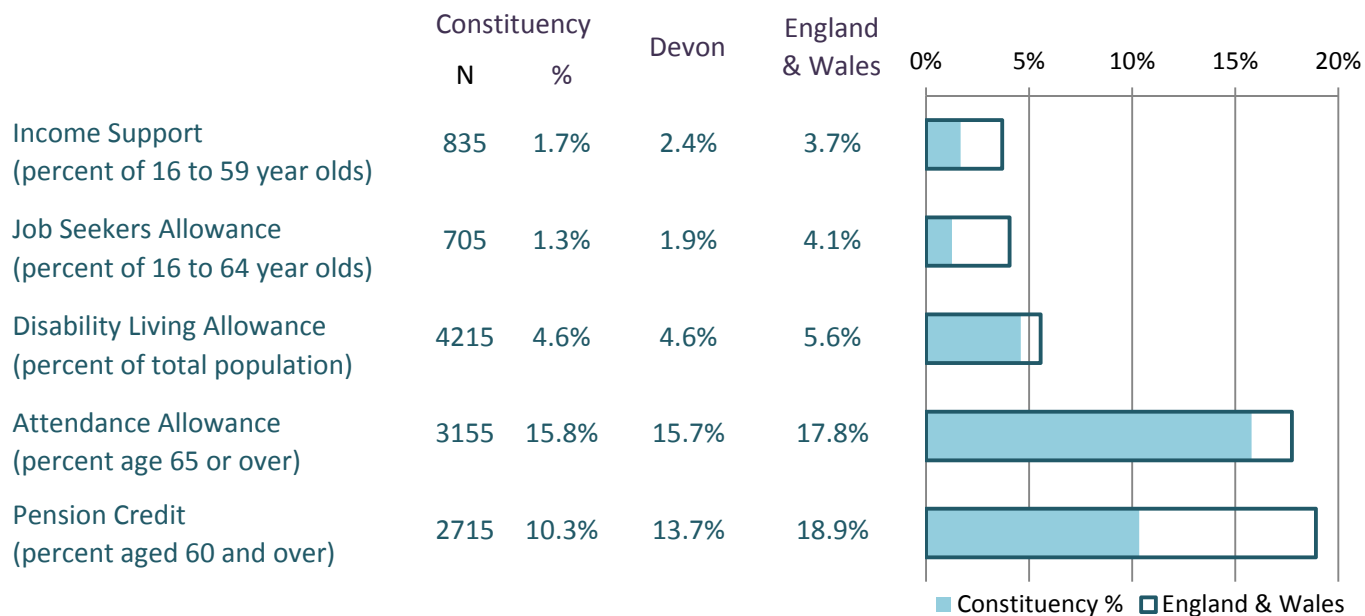

For all areas a higher score indicates greater deprivation
