

# DEVON BETTER CARE FUND OUTCOMES REPORT

## 7TH OCTOBER 2014

### OVERVIEW

This report monitors Better Care Fund Indicators for the Devon County Council area. The report format is based on the outcomes report for the Devon Health and Wellbeing Board and includes the following sections:

- Overview and indicator summary on page 1
- A dashboard showing current monthly in-year performance will be added on page 2
- Detailed indicator reports providing breakdowns comparing Devon to other South West local authorities and similar local authorities, as well as comparisons with the South West and England rates over time. Where available breakdowns are also provided by local authority district within Devon, by Clinical Commissioning Group and localities and by inequality characteristics such as deprivation from page 3 onwards. This is dependent on national comparator data being available, so will not be as timely as the dashboard data.
- Supplementary monthly dashboards for localities.

The new non-elective admissions indicator has been included in the overall and supplementary dashboards as a rate per 100,000 population. Local trajectories and national and local benchmarking data is still to be defined, so a full indicator report is not available yet.

Within Devon the rate of permanent admissions to care homes in older age groups is below regional and national averages and is falling over time with in-year data for 2013-14 suggesting further falls. Re-ablement service effectiveness at 91 days is currently above regional and national rates and remain around the 90% mark at the end of 2013-14. Higher levels of delayed transfers of care are seen in Devon, although rates have fallen over recent years. During 2013-14 delayed transfers peaked in May to October and are currently slightly above trajectory. Rates of avoidable emergency admission are below England and comparator group levels, but have increased during 2013-14 and are above the target trajectory. The dementia diagnosis rate has increased over recent years but is still below regional and national average. The patient/service user experience indicator is yet to be defined.

### Joint Commissioning Indicator List and Summary

Theme	RAG	Indicator	Latest Month	2013-14	L/T Trend	Dev/SW/Eng
Overarching	-	Non-Elective Admissions (rate)	9900.7	10003.1	-	-
Supporting	G	Care home admissions	513.9	556.4		
	G	Re-ablement (effectiveness)	90.2%	89.8%		
	-	Re-ablement (coverage)	-	2.0%		
	R	Delayed transfers of care	369.2	360.4		
	R	Avoidable emergency admissions	1858.2	1787.8		
	-	Patient/service user experience	-	-	-	-
Local	A	Dementia Diagnosis Rate *	49.7%	44.9%		

### RAG Rating Definition

<b>Red</b>	<b>R</b>	Failing to meet Better Care Fund target trajectory, statistically significant difference
<b>Amber</b>	<b>A</b>	Failing to meet Better Care Fund target trajectory, difference not statistically significant
<b>Green</b>	<b>G</b>	Meeting or exceeding Better Care Fund target trajectory

RAG rating based on latest reported position (monthly), current RAG rating thresholds shown on page 2.

Detailed indicators reports which have been updated since the last report are marked as:

**\*UPDATED INDICATOR\***

This report is produced in collaboration between the Devon County Council Public Health and Social Care Commissioning Teams and the NEW Devon CCG Business Intelligence Team.

# DEVON BETTER CARE FUND OUTCOMES REPORT

**Indicator:** Permanent Admissions to Care Homes (over 65)

**Period:** 2013-14

**Overview** There were 980 permanent admissions to care homes in 2013-14. The rate per 100,000 aged 65 and over in Devon was 556.4 which is significantly below the South West (656.2), local authority comparator group (642.1), and England (668.4) rates. Care home admission rates have been gradually falling in Devon over recent years. Within Devon rates were highest in North Devon District (614.3) and lowest in Mid Devon (347.7) and the South Hams (426.3). Rates fell sharply in Devon in 2013-14.

**Equalities** The highest permanent admission to care home rates are seen in the most deprived communities of Devon. Rates fell between 2012-13 and 2013-14 in all areas apart from the least deprived where they increased.

# DEVON BETTER CARE FUND OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Indicator:** Permanent Admissions to Care Homes (over 65)

**Period:** 2013-14

<b>Description</b>	Number of permanent admissions to residential and nursing care homes per 100,000 population aged 65 and over
<b>Source</b>	Adult Social Care Combined Activity Return. National Adult Social Care Intelligence Service (SW Benchmarking, Trend and Comparator Group) DCC Management Information Team (District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annually around four months in arrears.
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 3A Part 2
<b>Detailed Specification</b>	People counted as a permanent admission include Residents where the local authority makes any contribution to the costs of care, no matter how trivial the amount and irrespective of how the balance of these costs are met, and supported residents in local authority staffed care homes for residential care, independent sector care homes for residential care; and registered care homes for nursing care. It also includes residential or nursing care which is of a permanent nature and where the intention is that the spell of care should not be ended by a set date.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is BCF target (608.9 for 2013-14, 592.7 for 2014-15).
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON BETTER CARE FUND OUTCOMES REPORT

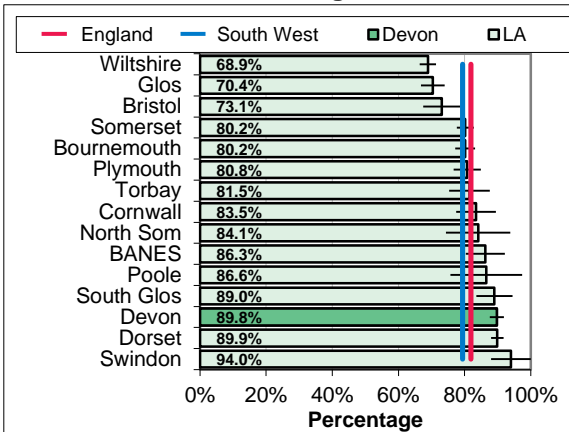

**Indicator:** Re-ablement Services (Effectiveness)

**Period:** 2013-14

<b>Overview</b>	In 2013-14, reablement services were effective for 89.8% of older people who received the service in Devon, which was significantly higher than the South West (79.4%), local authority comparator group (82.6%) and England (81.9%). The rate increased from 87.9% in 2012-13. Within Devon the highest rates were seen in Exeter (96.9%).
-----------------	---

<b>Equalities</b>	There is no significant link between the effectiveness of reablement services and deprivation levels in Devon.

## INDICATOR SPECIFICATION

**Indicator:** Re-ablement Services (Effectiveness)

**Period:** 2013-14

<b>Description</b>	Proportion of older people (65 and over) who were still at home 91 days after discharge from hospital into reablement/rehabilitation services.
<b>Source</b>	Adult Social Care Combined Activity Return. National Adult Social Care Intelligence Service (SW Benchmarking, Trend and Comparator Group) DCC Management Information Team (District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annually around four months in arrears.
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 2B Part 1
<b>Detailed Specification</b>	The proportion of older people aged 65 and over discharged from hospital to their own home or to a residential or nursing care home or extra care housing for rehabilitation, with a clear intention that they will move on/back to their own home (including a place in extra care housing or an adult placement scheme setting), who are at home or in extra care housing or an adult placement scheme setting 91 days after the date of their discharge from hospital
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level <a href="http://www.devonhealthandwellbeing.org.uk/library/maps">www.devonhealthandwellbeing.org.uk/library/maps</a> . Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is BCF target (84.7% for 2013-14, 81.5% for 2014-15).
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

# DEVON BETTER CARE FUND OUTCOMES REPORT

**Indicator:** Re-ablement Services (Coverage)

**Period:** 2013-14

**Overview**  
 In 2013-14 2.0% of older people discharged from hospital in Devon were offered reablement services which was significantly lower than the South West (3.7%), local authority comparator group (3.4%) and England (3.3%) rates. Rates increased from 1.7% in 2013-14.

**Equalities**  
 Not currently available at a local level.

<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is secondary target to increase coverage (2.50% for 2013-14, 3.28% for 2014-15).
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON BETTER CARE FUND OUTCOMES REPORT

**Indicator:** Delayed Transfers of Care

**Period:** 2013-14 rolling year (Dec-12 to Nov-13)

**Overview**  
 Devon had an average of 349.4 days of delayed transfers of care 100,000 population aged 18 and over per month compared with 315.4 in the South West, 300.6 in the local authority comparator group and 270.4 in England for the latest available year. The rate fell from 360.3 in 2012-13 to 349.4 in the latest 12 months.

**Equalities**  
 Delayed transfers of care are more likely affect groups who are more frequently hospitalised, with higher rates in older age groups, and a greater number of females affected. Persons living alone and those who are socially isolated are more likely to be affected by delayed, as are those with more complex support needs.

## INDICATOR SPECIFICATION

**Indicator:** Delayed Transfers of Care

**Period:** 2013-14 rolling year (Dec-12 to Nov-13)

<b>Description</b>	Average monthly number of days of delayed transfers of care per 100,000 population aged 18 and over
<b>Source</b>	Health and Social Care Information Centre Indicator Portal: <a href="http://www.indicators.ic.nhs.uk/webview/">http://www.indicators.ic.nhs.uk/webview/</a>
<b>Update Frequency</b>	To be confirmed (rolling annual rate)
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 2c
<b>Detailed Specification</b>	Numerator is average number of acute and non-acute days of delayed transfers of care (18+) per month is calculated from the MSitDT data by taking the patient snapshot figures for each month in 2012-13 (number of patients with a delayed Transfer of care at midnight on Thursday) and dividing by 12. Denominator taken from population figures for those aged 18 and over. Crude rate per 100,000 (numerator divided by denominator multiplied by 100,000).
<b>Chart Notes South West</b>	Compares Former Primary Care Trusts in the South West Region. Error bar not calculable.
<b>Chart Notes Local Authority</b>	Rates cannot currently be calculated at a local authority district level.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar not calculable.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is BCF target (334.4 for 2013-14, 308.5 for 2014-15).
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON BETTER CARE FUND OUTCOMES REPORT

**Indicator:** Avoidable Emergency Admissions (Crude Rate)

**Period:** 2013-14 rolling year (Oct-12 to Sep-13)

**Overview**  
 In the period from October 2012 to September there were x avoidable emergency admissions across Devon. The rate per 100,000 population was 1787.8 in Devon, which was in line with the South West rate (1786.6), but significantly below the local authority comparator group (1867.2) and England (1976.3) rates. Admission rates are higher in older age groups, which means that there is a tendency for areas with older age profiles to have higher rates, hence the lower rates in urban areas.

**Equalities**  
 Local breakdowns by equality and inequality characteristics are still in development. Previous analyses of avoidable admission rates reveal higher admission rates in older age groups and in males. Admission rates also tend to be higher in areas with higher levels of social deprivation.

# DEVON BETTER CARE FUND OUTCOMES REPORT

## Local Indicator: Dementia Diagnosis Rate

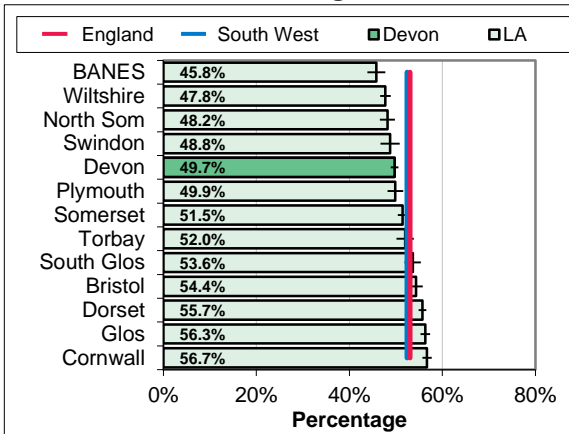

Period: August 2014

**\*UPDATED INDICATOR\***

**Overview** In August 2014, 6,839 people in Devon were on a GP register for dementia, compared with an expected prevalence of 13,754, this is a diagnosis rate of 49.7%. Rates in Devon have remained below the South West and England rates. Diagnosis rates have improved in recent years, increasing from 28.0% in 2006-07 and 44.9% in March 2014. The highest rates in Devon are seen in Teignbridge area (55.4%) and are particularly high in Newton Abbot (59.3%).

**Equalities** There are no significant differences in Devon based on area deprivation. Dementia prevalence rates are higher in females. This, coupled with longer life expectancy, means females with dementia outnumber males by more than two to one. Prevalence rates for dementia increase rapidly with age, with one in 1400 affected under the age of 65, compared with more than one in five in those aged 85 and over.

# DEVON BETTER CARE FUND OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Local Indicator:** Dementia Diagnosis Rate

**Period:** August 2014

<b>Description</b>	Number of persons recorded on a GP Dementia Disease Register as a % of those in the area predicted to have dementia (using age and sex based estimates)
<b>Source</b>	NHS Dementia Prevalence Calculator, Devon Public Health Intelligence Team (Local GP Practice Deprivation Quintiles)
<b>Update Frequency</b>	Monthly, timings to be confirmed
<b>Outcomes Framework</b>	NHS Outcomes Framework Indicator 2.6i, Public Health Outcomes Framework Indicator 4.11 - not yet finalised as new dementia prevalence estimates are currently being devised to inform the frameworks.
<b>Detailed Specification</b>	Numerator is the number of people on a GP practice dementia disease register at the end of the given period and reported through the Quality and Outcomes Framework. Numbers predicted to have dementia apply local GP practice population in quinary age bands to age and sex specific dementia prevalence rates from the 2007 Dementia UK prevalence study. Rate divides the number on the QOF register by the predicted number with dementia to give the percentage diagnosed. GP practice numerators and denominators are aggregated to areas based on location of practice.
<b>Chart Notes South West</b>	Compares Former Primary Care Trusts in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on GP practice attributions. Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is proposed revision to BCF plan submission (46.7% in 2013-14, 51.5% in 2014-15).
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).
