

## Public Health Intelligence Team

# JSNA Profile - East Devon 005A

## About this profile

The aim of the JSNA is to collaboratively identify current and future health and wellbeing needs to inform future service planning and delivery. This profile contains a range of socio-economic, health, care and wellbeing related data, which provide a detailed assessment of current need and service activity at a local level. In addition to data relating to the selected area, information is provided for the hierarchy that the area is within.

This profile contains indicators on population, deprivation, children and young people, uptake of benefits, health-related behaviour, and health and care activity and outcomes. Except for modelled data, rates are not available for counts of less than five. These are marked with a '#'."

This report was created by the Devon Public Health Intelligence Team with assistance from colleagues across the County Council, Careers South West, Babcock LDP, NEW Devon CCG and the Devon Partnership Trust.

If you have any comments or questions please email [publichealthintelligence-mailbox@devon.gov.uk](mailto:publichealthintelligence-mailbox@devon.gov.uk)

# Deprivation

## Index of Multiple Deprivation

The English Indices of Deprivation measures relative levels of deprivation in small areas of England called Lower Super Output Areas (LSOAs). The overall measure is called the Index of Multiple Deprivation (IMD). This produces an IMD score (bar chart below showing score in 2015) and a national rank out of 32,844 LSOAs (trend in national rank shown in line chart below). Deprivation and health are closely connected, with areas with higher levels of deprivation tending to experience poorer health outcomes. Reducing social inequalities in health is a major focus of the work of Health and Wellbeing Boards.

Area	2004	2007	2010	2015
East Devon 005A	17,288	13,855	13,823	15,059
East Devon	21,594	20,583	20,558	21,840
Eastern Locality	18,144	18,073	18,439	19,166

## Indices of Deprivation Domains

The Indices of Deprivation are comprised of an overall Index of Multiple Deprivation (IMD); seven domains which contribute to the overall index covering income, employment, health, education, barriers to housing and services, crime and living environment; and two supplementary indices relating to income deprivation in children (under 16) & older people (60+).

The following chart compares the area's national rank on the IMD, seven domains and two supplementary indices in 2015, with the average ranks for their local authority district and Devon as a whole. The value axis ranges from the most deprived LSOA in the country (1) to the least deprived LSOA in the country (32,844) on a given measure, and the chart is further divided into five sections highlighting the national deprivation group (quintile).

Area	IMD	Income`	Employ	Health	Educ	Barr	Crime	Env	<16	60+
East Devon 005A	15,059	16,063	14,271	15,755	25,234	21,279	4,319	7,717	17,523	20,314
Q3 - Average	16,528	18,189	18,566	17,889	18,762	22,376	13,682	9,928	18,552	19,381

Devon	18,100	18,829	18,516	18,043	20,310	22,609	15,360	12,098	19,137	20,444
Eastern Locality	19,165	19,761	19,482	18,344	21,705	22,246	16,561	12,715	20,213	19,955

## Indices of Deprivation Domains Descriptions

IMD	Index of Multiple Deprivation
Income	Income Domain. Persons dependent on state benefits and tax credits.
Emp	Employment Domain. Persons involuntarily excluded from the labour market.
Health	Health Domain. Covers mental health, admissions, illness & premature death.
Educ	Education Domain. Measures educational attainment and participation.
Barriers	Barriers to Housing and Services Domain. Covers affordability and distance.
Crime	Crime Domain. Levels of violence, burglary, theft and criminal damage.
Env	Living Environment Domain. Quality of indoor and outdoor environment.
<16	Income Deprivation Affecting Children Index (IDACI). See income.
60+	Income Deprivation Affecting Older People Index (IDAOPI). See income.
